

**Report to NCFE—2022 Spring Gathering
Alternatives to Violence Project**

The physical isolation due to the coronavirus has prohibited holding in-person AVP workshops; therefore, we have taken our workshops online using the Zoom platform. Since August 2021, we have completed two Basic community workshops with a total of 25 participants.

Although we have been unable to conduct training in the prisons, we have continued to communicate with the prisons through their program directors. We were invited to return to in-person workshops in January 2022. However, we had no assurance that prison staff members are vaccinated. Therefore, we continue to await reduced Covid-19 numbers for our return. We look forward to returning to in-person workshops in the community and in the prison.

The AVP facilitators are grateful for NCFE's support for the AVP program in the form of your prayers, your encouragement, and your financial support. The \$500 awarded by the NCFE Outreach Working Group will support the work at Alexander CI once volunteers can safely return to the facility.
